Progress Report

Bardia Mojra

February 20, 2022

Robotic Vision Lab

The University of Texas at Arlington

1 Specific Research Goals

- VPQEKF (April 1st): Work on the paper.
- DLO Manipulation Dataset (September - ICRA)

2 To Do

- QEKF Paper - 30% extension (April 1st):
  - Edit VEst section and add updates.
- QEKF Implementation (Feb. 15th):
  - Collect Vicon data (Feb. 15th) - Done
  - Test on multiple datasets
- QEKF/QuEst+VEst Implementation (Feb. 28th):
  - Implement QuEst 5-point (Feb. 15th) - On-going
  - Implement VEst (Feb. 15th)
  - Address scale factor (depth-scale) issues
  - Address "hand off" issue when objects enter or leave field of view
  - Real-time streaming images for real-time operation (optional)
  - Experiments
  - Feature point extraction
  - Noise issue: noise cannot be modeled
- DLO Manipulation:
  - Related work literature review
  - Real dataset + paper (September 2022 - ICRA):
    - Watch IROS manipulation workshop videos.
    - Design, discuss and build a data collection and test rig (on-going)
    - Purchase DLO samples for data collection
  - Unity dataset
    - Recreate virtual duplicates of physical test material
    - Model dynamics and deformity

3 Progress

The following items are listed in the order of priority:

- VPQEKF (April 1st, 2022): I finished updating QEKF to use Numpy-Quaternion instead of PyQuaternion. Currently, I am rewriting Quest 5-point algorithm and I should be complete by next weekend. Moreover, Dr. Gans and I went over the algorithm and he helped me understand it.
- DLO Manipulation: No update.
- NBV-Grasping Project: No update.
- PyTorch Tutorials: Transfer learning.
- Pose Estimation: I will need it for DLO segment localization.

4 Intermediate Goals - Fall 2021:

- QEKF: Finish paper.
- UR5e: Do the tutorials.
